

ROUND TABLE-CLOTHS

Dear Customer,

the new round table-cloth you are receiving, has a light oval shape to compensate the inevitable shrinkage on warp direction (length); before using, please wash this table-cloth with your standard washing process in hot water and detergent, following natural shrinkage.

To have a better result, in order to facilitate the ironing process, we have sewed two opposite labels on the diameter of the round table-cloth; please fold the table-cloth following the line between the two labels and introduce it into the flatwork ironer, through the folded line (see picture N° 1). For small flatwork ironers, please fold the table-cloth superimposing the two labels and introduce the table-cloth into it through the round side (see picture N° 2).

Your faithfully.
